**Subject:** Re: Libman Company Wastewater Discharge

Bill,

We reviewed further and decided it would be best to not allow this.

Too much of a risk for the City.

Thanks,

Terry

My first pass through looking at this is no.

It's ammonia chloride which could have a detrimental impact on the bugs in the lagoon.

They'll say it's a small amount - but I would not want to risk it.

**Subject:** Libman Company Wastewater Discharge

Hello Alex,

Per our phone conversation, The Libman Company is seeking permission to discharge the attached material to the Arcola Wastewater Treatment Facility. The facility generates the material during the production process, where it is stored in 220 gallon totes. Average discharge will be one 220 gallon tote, weekly.

Please let me know if there would be any issues with this discharge. The state permit application requires the signature of the POTW supervisor.

Regards,
